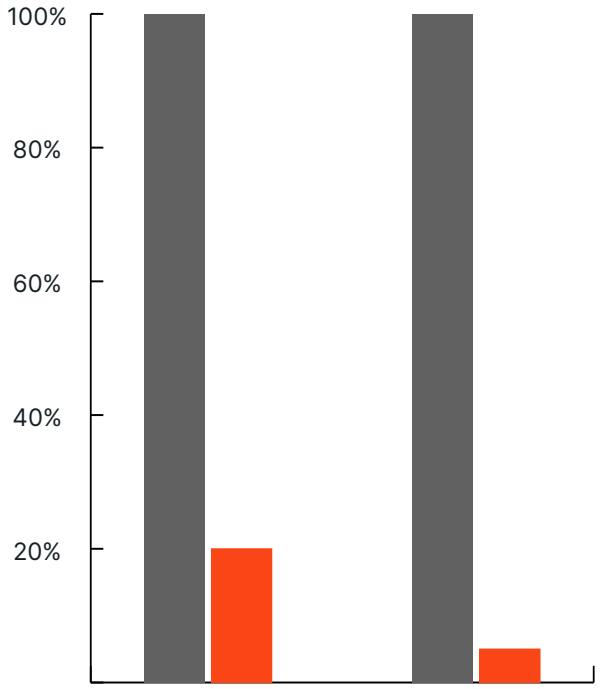
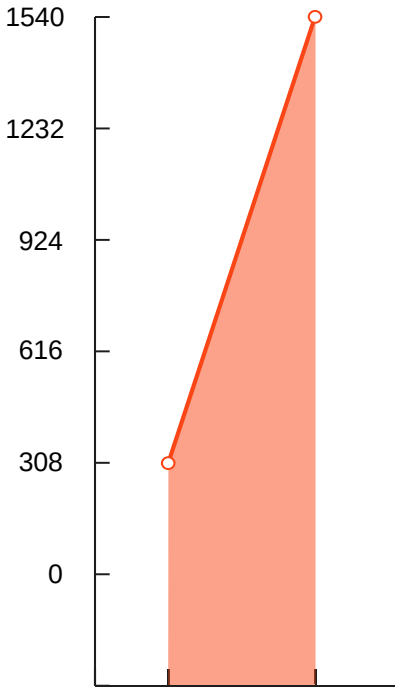
Invoice processing





Before using UiPath

After using UiPath

2 minutes per invoice after automations

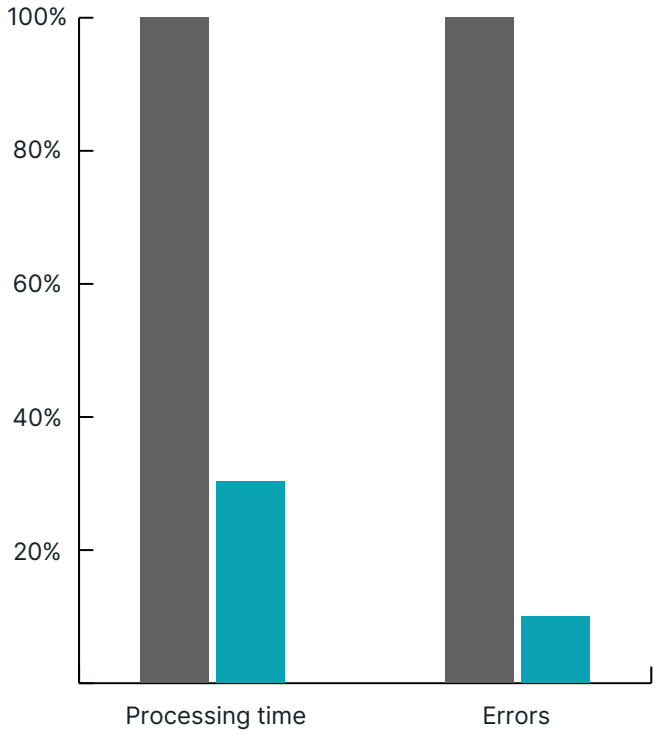
616 hours saved each month

1540 invoices per month with same resources

Finance teams spend an average of **8.6 hours** per week manually processing invoices, with error rates reaching **3.6%**. Agentic automation dramatically reduces processing time by 80% while virtually eliminating errors.
Our AI agents intelligently extract, validate, and process invoice data, while robots handle repetitive tasks—freeing your team for strategic work.

68% of AP teams still enter invoices manually, with processing times averaging 14.6 days and 39% of invoices containing errors.

Accounts payable/receivable



Before using UiPath

After using UiPath

70% time savings

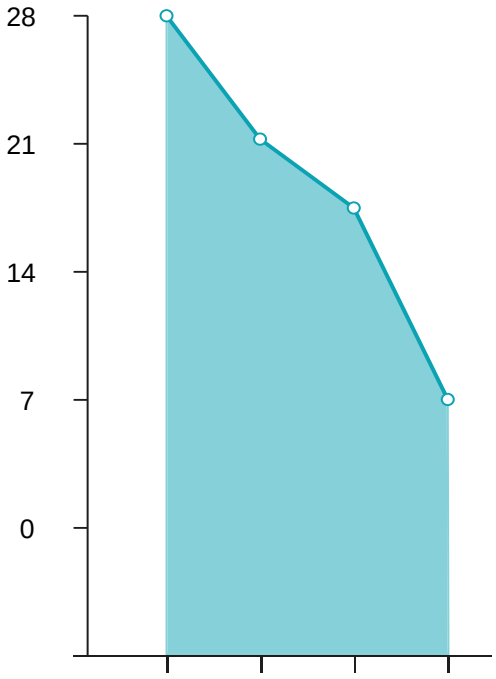
90% decrease in errors

60% DSO reduction

Your AP/AR processes become strategic advantages. Our AI agents optimize payment timing, accelerate collections, and reduce DSO.

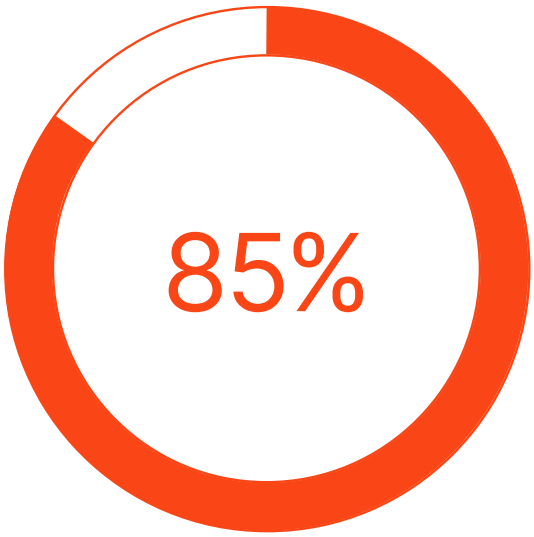
The result: improved cash flow, stronger vendor relationships, and significant cost savings.

33% fewer duplicate or incorrect payments for companies that have fully-optimized automation for accounts payable.

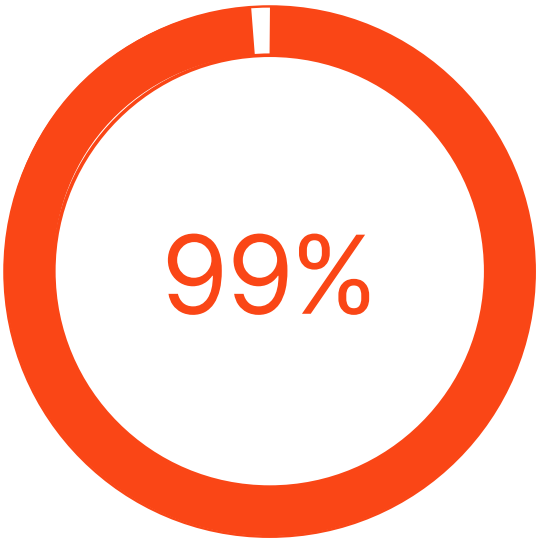


Reduction in DSO over time

PO matching



Reduction in time spent on PO matching



Matching accuracy

Achieve perfect purchase order matching:

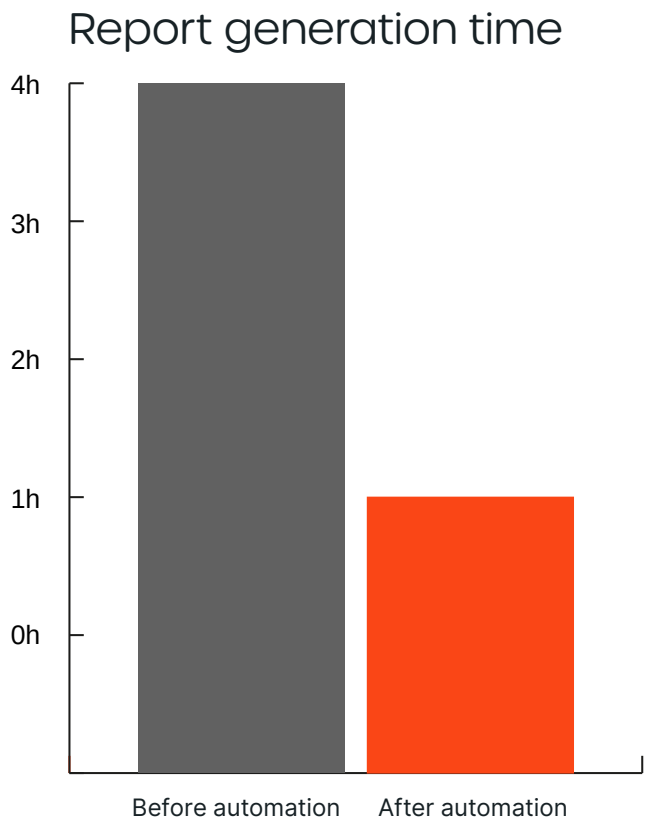
UiPath agentic automation brings near-perfect accuracy to PO matching while reducing processing time by up to **85%**. Our AI agents intelligently reconcile discrepancies across invoices, POs, and receipts, while robots handle the execution—eliminating bottlenecks in your procurement process.

Manual invoice processing creates costly inefficiencies.
40% of companies still receive paper invoices, and 73% manage them via email or spreadsheets. This fragmented approach leads to information silos where key documents go unnoticed and manual PO matching creates procurement bottlenecks and delays.

33 **hours saved per month in PO matching**

1% **accuracy improvement**

Financial analysis and reporting



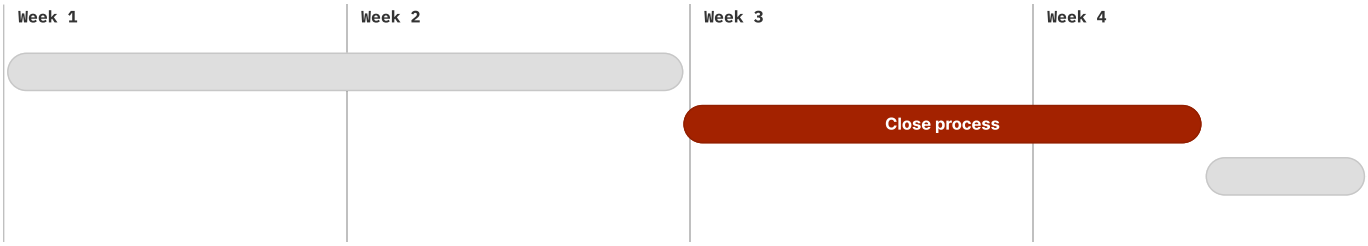
3x more frequent reporting capabilities

Transform reporting from a monthly burden to a continuous strategic asset. Agentic automation generates accurate financial reports in minutes, not days. Our AI agents analyze trends, identify anomalies, and deliver actionable insights that drive better business decisions.

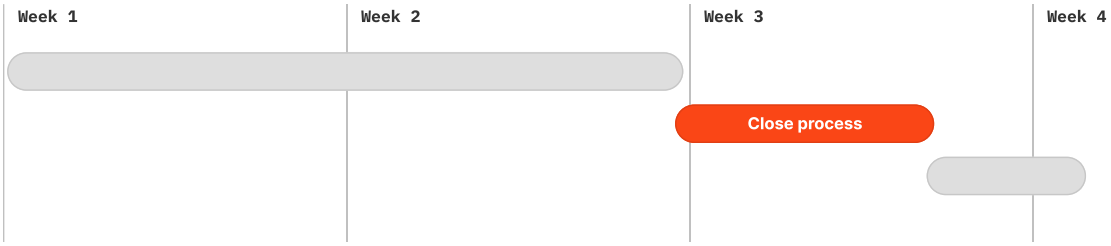
Over 70% of finance teams dedicate half their time to data collection and preparation. Even more concerning, 85% of companies make critical decisions based on incomplete or inaccurate data—leading to an average loss of $15 million annually.

Month-end close

Before UiPath



After UiPath



Accelerate your financial close

99% accuracy in financial statements

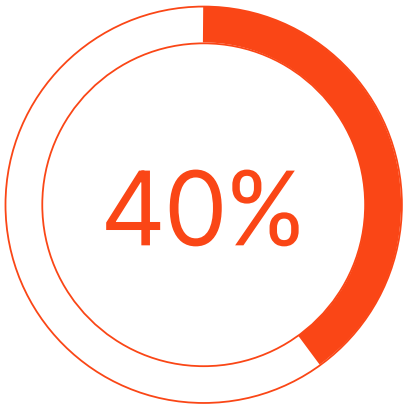
Compress close cycles from weeks to days while improving accuracy. AI agents orchestrate complex close processes, identify reconciliation issues, and ensure compliance, while robots execute repetitive tasks with perfect precision.

Over 90% of financial leaders reported challenges with the financial close process. Organizations adopting AI-driven solutions have achieved over 50% reduced close times with improved compliance and reduced operation costs.

Overall F&A department efficiency

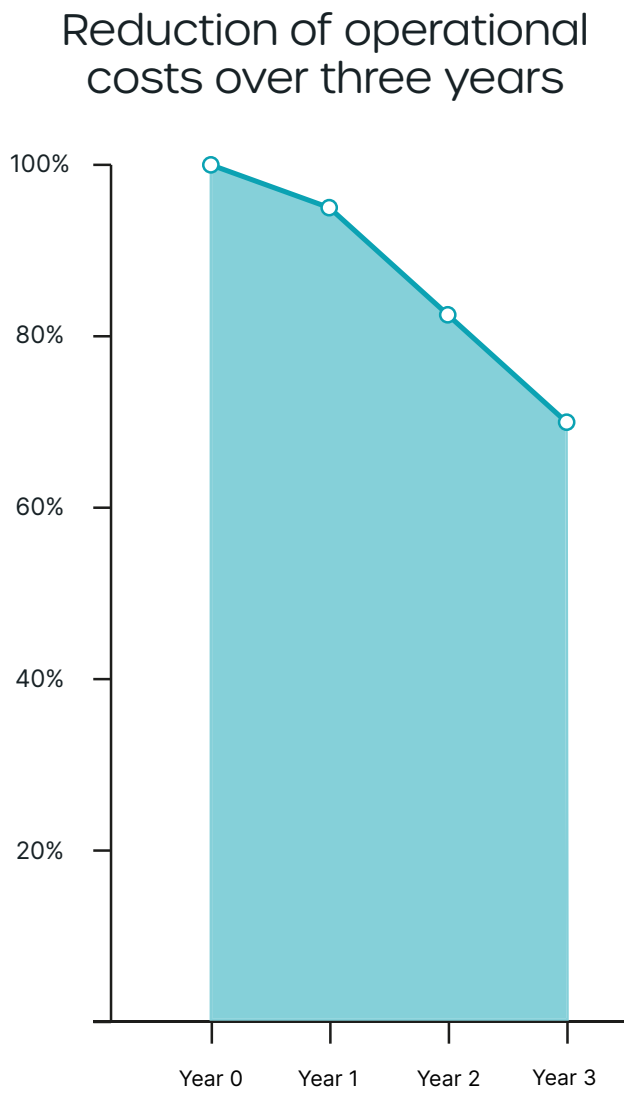
Multiply your finance team's capacity with UiPath agentic automation.

Deliver **40%** productivity improvement without adding headcount. Our digital workforce handles routine processes while your team focuses on strategic initiatives—reducing operational costs by **30%** over three years.



Improvement in overall productivity

Tasks handled per month by same team

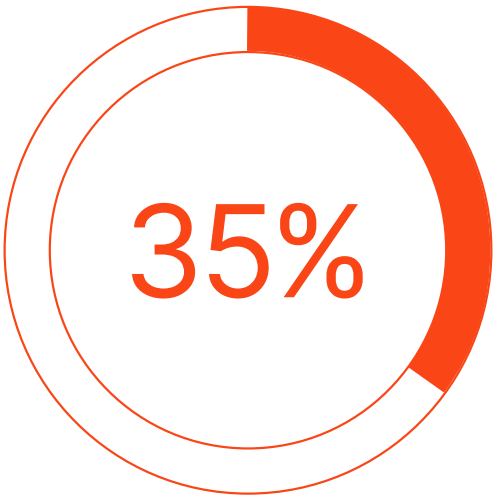


Employee satisfaction and strategic work

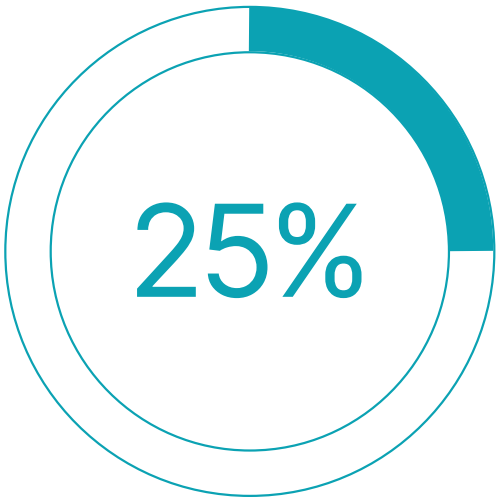
By automating repetitive tasks, agentic automation increases time for strategic work by **35%**.
Your employees become business partners rather than data processors—driving innovation, improving satisfaction, and reducing turnover.

Automation boosts employee engagement through:
32% better work-life balance
31% more engaging projects
27% more opportunities to learn digital tools

Elevate your team's potential



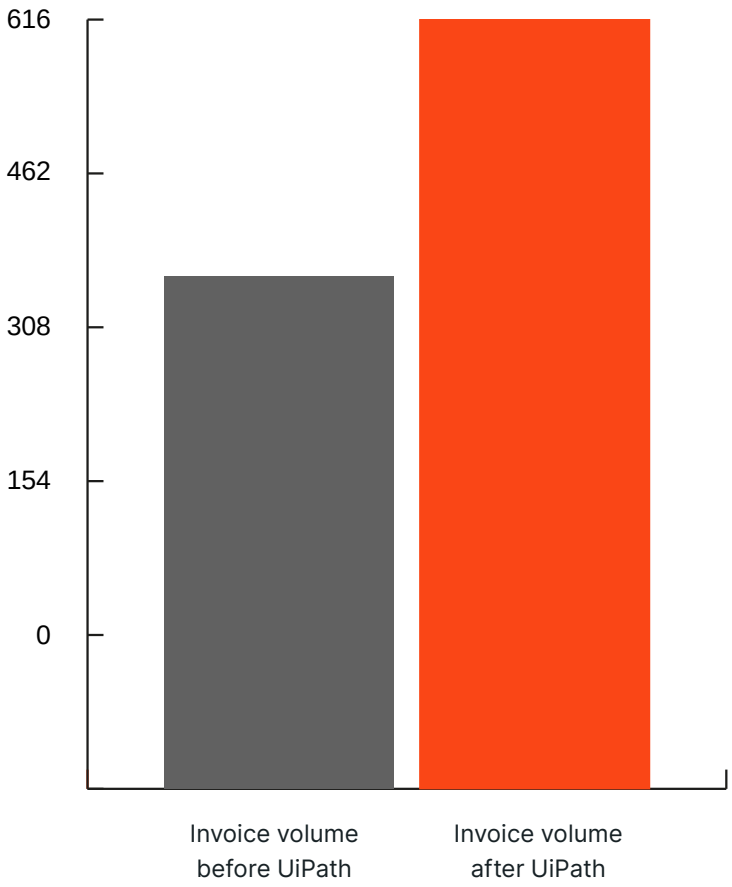
Increase in time for strategic tasks



Employee satisfaction improvement

Scalability

Growth accommodation: Scale without constraints



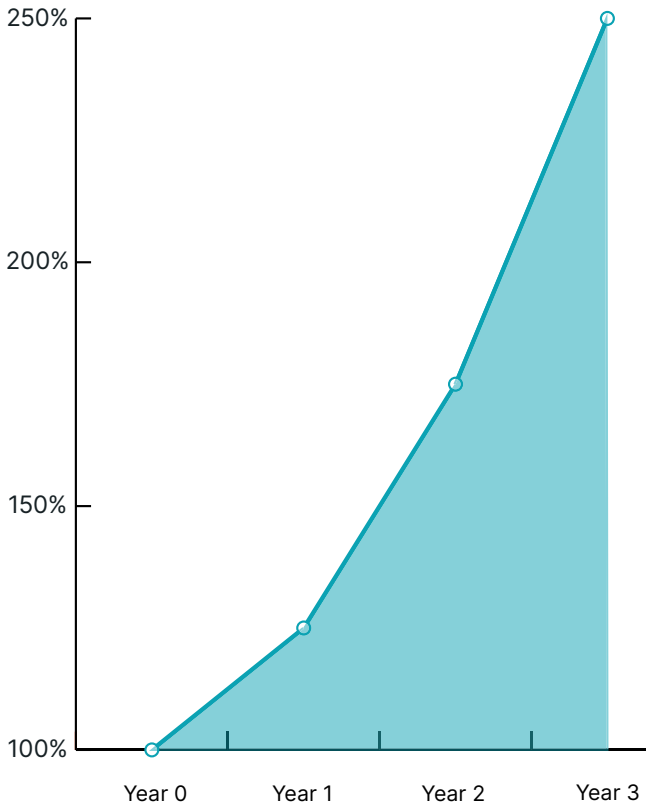
UiPath agentic automation grows with your business without proportional cost increases. Our digital workforce can be rapidly deployed to handle volume spikes, new processes, or business expansion—providing the agility modern businesses require.

Traditional: As organizations expand, finance headcount grows nearly linearly—typically 6–10 new FTEs for every major increase in scale.

With Agentic Automation: Dozens of FTEs can be avoided as growth accelerates. Automation enables scale without proportional cost increases.

Return of investment

ROI over time



Beyond direct labor savings, you'll benefit from faster processing, fewer errors, improved compliance, and better decision-making—creating compounding returns across your organization.

Recent ROI modeling indicates UiPath automation can achieve payback within 6 months, consistent with long-standing benchmarks showing 6–9 months across finance & operations use cases.

1. Initial implementation costs offset by early savings
2. Accelerating savings as automation scales
3. Total accumulated savings over 3 years reach 250% ROI—or 3.5× the original investment

Canon

- **Achieved 53% straight-through processing without human intervention**
- **Processed 824,000 invoices/year**
- **70% faster processing time**

ThermoFisher SCIENTIFIC

- **Achieve ~90% straight-through process**
- **Processed ~40,000 invoices in under 9 months**
- **85% accuracy in automated data collection**

Spotify

- **45,500+ hours saved across the business from automation initiatives**
- **Improved accuracy, availability, and employee satisfaction**

Compliance and audit

Strenghten your compliance posture

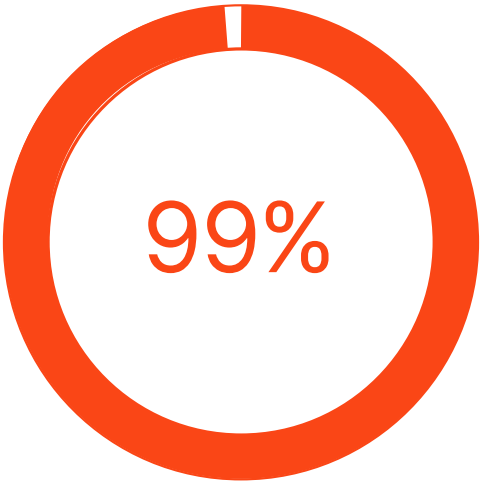
UiPath agentic automation reduces audit preparation time by **80%** while ensuring **99%** adherence to regulatory requirements. The digital workforce maintains perfect audit trails, follows consistent processes, and eliminates human error—reducing compliance risk and costs.

The result? Companies with automated compliance functions report 72% fewer findings in regulatory audits.

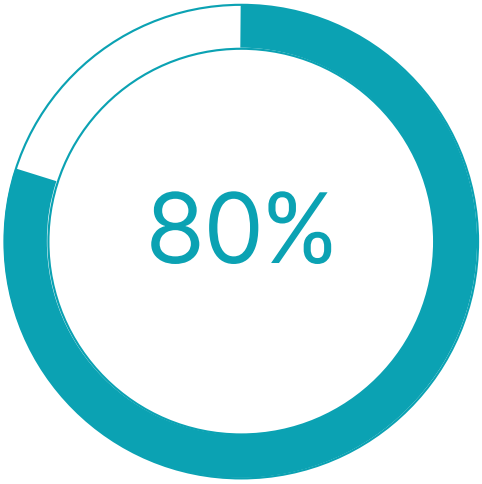
Compliance teams—averaging about 15 staff—are increasingly bearing workload growth, with 62% reporting headcount increases to manage in-sourced compliance activities, supported by 65% investing in technology to reduce manual burden.

5 **hours spent in audit preparation**

4 **hours saved**



Adherence to regulatory requirements



Less time spent in audit preparation
